PROFESSIONAL SUMMARY

Frontend and Mobile Developer with 4+ years of experience specializing in React Native, building scalable and high-performance cross-platform mobile applications. Proficient in React.js, TypeScript, and Angular with strong experience in REST API integration and real-time feature development. Skilled in modular UI architecture, performance optimization, and maintainable code practices. Proven ability to deliver user-centric solutions, with a focus on code quality, scalability, and seamless user experience.

CORE SKILLS

Frontend: React.js, Angular, Next.js, HTML5, CSS3
Mobile: React Native, Expo, Cross-Platform Development
State Management: Redux, Redux Thunk, NgRx, React Query, Redux Toolkit (RTK Query)
Languages: JavaScript (ES6+), TypeScript
API & Integration: REST APIs, Axios, Real-time Data Handling
Tools & Workflow: Git, GitHub, Figma, Zeplin, Agile/Scrum, CI/CD

PROFESSIONAL EXPERIENCE

React Native Developer | IndiaFilings Private Limited, Chennai *Mar 2024 – Oct 2025*

Project 1: IndiaFilings Mobile App *Tech: React Native, Redux Thunk, REST APIs, TypeScript*

- Engineered scalable UI modules including Service Listing, Authentication, and Ledger features, reducing onboarding friction for registered users
- Integrated REST APIs for real-time data handling, improving data fetch efficiency through optimized Redux Thunk workflows
- Built workspace collaboration features including in-app chat, document upload, and document management
- Followed Agile/Scrum methodology with bi-weekly sprint cycles, delivering features on schedule with zero critical production bugs

Project 2: Ledgers App *Tech: React Native, TypeScript, REST APIs, Redux Thunk*

- Built end-to-end invoicing and accounting modules — Dashboard, Invoice, and Receivables — used by SME users for daily financial tracking
- Developed OCR-based feature to auto-extract data from invoices and visiting cards, significantly reducing manual data entry time
- Implemented camera-based data capture with real-time image processing, improving data entry speed compared to manual input
- Optimized app performance through lazy loading and memoization, reducing initial load time

Frontend & React Native Developer | Jetcode, Cuddalore *Jul 2021 – Feb 2024*

Project 3: Gyrus NEET Exam App & Web Portal *Tech: React Native, React.js, JWT, React Query*

- Developed a full-featured NEET exam simulation platform with dynamic test modules aligned to real exam patterns
- Implemented JWT-based authentication and role-based access control (Admin, Manager, Feeder), reducing unauthorized access incidents to zero
- Integrated React Query for efficient server-state management, cutting redundant API calls and improving perceived performance
- Built a custom scientific keyboard for equation inputs, supporting 50+ mathematical operators used in NEET Physics and Chemistry questions
- Designed a notification system for individual, group, and broadcast messaging, increasing student engagement

- Created question management, test creation, and user analytics modules used by 20+ educators to track student progress

Project 4: ACAD – Learning Management System (LMS) *Tech: React.js*

- Developed reusable UI components supporting classroom and distance learning workflows for an LMS platform
- Collaborated in Agile sprints with cross-functional teams; participated in client calls and delivered bi-weekly demos with zero project delays
- Led bug fixing across 3 development stages, resolving 80+ issues and improving overall platform stability

Project 5: Webinar Mobile Application *Tech: Angular, Ionic*

- Developed a mobile application for webinar-based activities using Angular, improving user interaction flows and reducing navigation errors
- Implemented 6+ UI components based on client requirements, delivering features within sprint deadlines in a fast-paced Agile environment

EDUCATION

Bachelor of Engineering – Computer Science *2017-2021*

Krishnasamy College of Engineering & Technology, Cuddalore
